

Hobby Work Station

The hobby work station is a great way to keep your workspace tidy and organized. It features trays and holders that allow you to have easy access to your paints, tool and accessories. The two piece cutting board is replaceable, (kit-7006CB) or will fit a 8.5"x12" cutting mat. Kit includes a HO and N gauge scales as well as Imperial. Easy assembly in minutes using white glue and some masking tape (not included). If you like you can stain and seal it with urethane, this will make it look like some of the masterpieces that you will build on your work station. Enjoy!

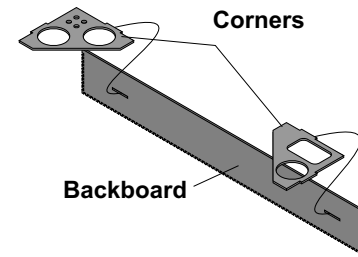

Accessories Not Included
Work Station Measures
19" x 11.5"

Hobby Work Station

Note:

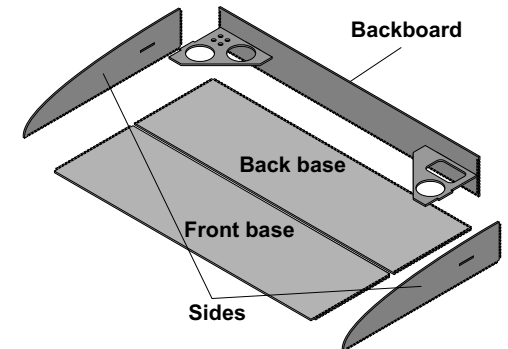

Regular white glue is used for construction. For best results dampen all joints with water, this helps the glue seep into the grain. Use masking tape to hold pieces together while glue dries. Build time approx 5 minuets.

1: Glue corners into slots on backboard.

2: Glue backboard to base.

3: Glue sides to front and back base making sure that backboard and corners interlock.

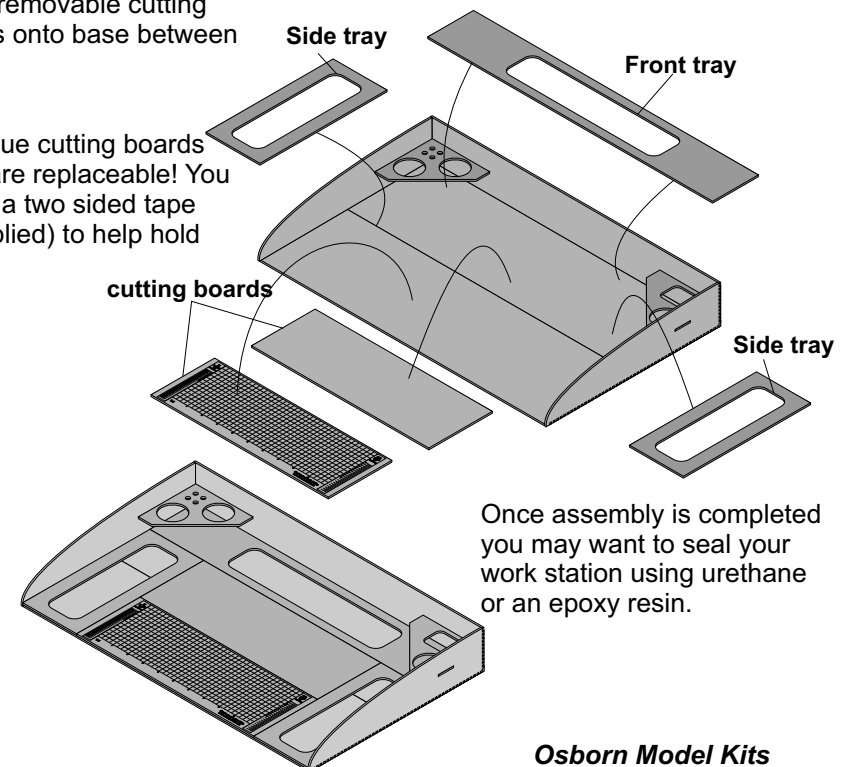

Note:
 Test fit all parts before glueing

4: Glue trays to base

5: place removable cutting boards onto base between trays.

Note:

Do not glue cutting boards as they are replaceable! You may use a two sided tape (not supplied) to help hold in place.

Note:

Once assembly is completed you may want to seal your work station using urethane or an epoxy resin.
