1037

Place back crossbuck board in jig first, then put a dab of glue on the centre of the board. Place post into jig on top of the crossbuck board. Put a dab of glue on the top surface of the post and place front crossbuck board onto front of post.

## PAINTING

Peel and stick the supplied vinyl decals onto the crossbucks or use a dry brushing method to paint the crossbucks boards. Avoid getting paint in the words, you may need to go over the crossbucks boards several times to build up a good finish.
